When we say a woman, we look first and foremost the image of the great and majestic mother. Human beings will learn all the good and good things in the universe, the secrets of life, and the lessons learned through the kindness of their mother. There is a woman, the world is full of life, the life of a woman is beautiful and charming. It is impossible to imagine a human being separated from one another. Those who make families and societies united with families, who love the family and our society, are truly our beloved mothers and sisters. That is why we celebrate March 8 as the International Women's Day. This holiday is widely celebrated today not only in our country, but also in all corners of the globe. Indeed, the role women play in our family is unique. Akilila beautiful women maintain balance in the family, and in the whole society, with their care, kindness and heartfelt love, cleanliness, honesty, sincerity and justice. There is a great sense when the great wise men are looking for the best description of the Motherland, compared to the Mother of the Mother. The most suitable one in the world is the word "sacred" - "Mother". All of our women were invited to dance, singing beautiful songs about our beloved people, our beloved mothers who came to this celebration. The holiday was held in a very extensive manner. Indeed, respecting the Motherland, the respect for women is a virtue that is elevated to the highest value for our nation, our people. The more we glorify women, the more beautiful we are, the more we celebrate our Motherland. Once again, we congratulate all women on their holidays.
