

In Master class

✖ The State Committee of the Republic of Uzbekistan for Land Resources, Geodesy, Cartography and State Cadastre organized a seminar on "High Level Practice" on March 27th. At the seminar, the participants were informed about the use and application of modern technologies and software in the industry. At the seminar, highly qualified specialists from Russia showed their technologies. In this workshop participated young professors and teachers of our institute "Management of land resources".

Teacher of Geodesy and Geoinformatics Department, Islomov Utkir

Institutut spokesman Rahimboy Jumaniyazov
